# Innovating education with AI and OER

To foster a global and intercultural dialogue space where students critically analyze how Artificial Intelligence (AI) and Open Educational Resources (OER) are transforming education, examining their impact on teaching practices, learning experiences, accessibility, and inclusion across different educational contexts, comparing innovative approaches from various countries in order to propose strategies that enhance educational quality, promote lifelong learning, and support the development of digital competencies in higher education.

**Saturday**

June 13th of  
2026

Starts at  
**09:00AM**  
**(GMT-6)**
