

When marking papers AI shows gender bias.

Can teachers still use it?

Gender Bias

When marking papers AI shows gender bias.
Can teachers still use it?

Gender Bias

A teacher prohibits pupils (aged 13) from using generative AI but uses it to generate material.
Parents find out and are furious.

Teachers' use
of AI

A
If pupils
aren't allowed to
use AI, neither
should the teacher

B
The teacher
must do the work
that's what
they're paid for

C
Teachers are
capable of using
AI responsibly;
pupils aren't

...

D

Teachers' use
of AI

A teacher prohibits pupils (aged 13) from using generative AI but uses it to generate material.
Parents find out and are furious.

A student, who attended few classes and previously got poor results, hands in an excellent assignment. The teacher is convinced the student used AI, but has no proof.

Suspicious of AI use without evidence

A
The teacher should give a low grade

B
The institution should establish clear rules on the use of AI

C
High quality work should be given a high grade

D

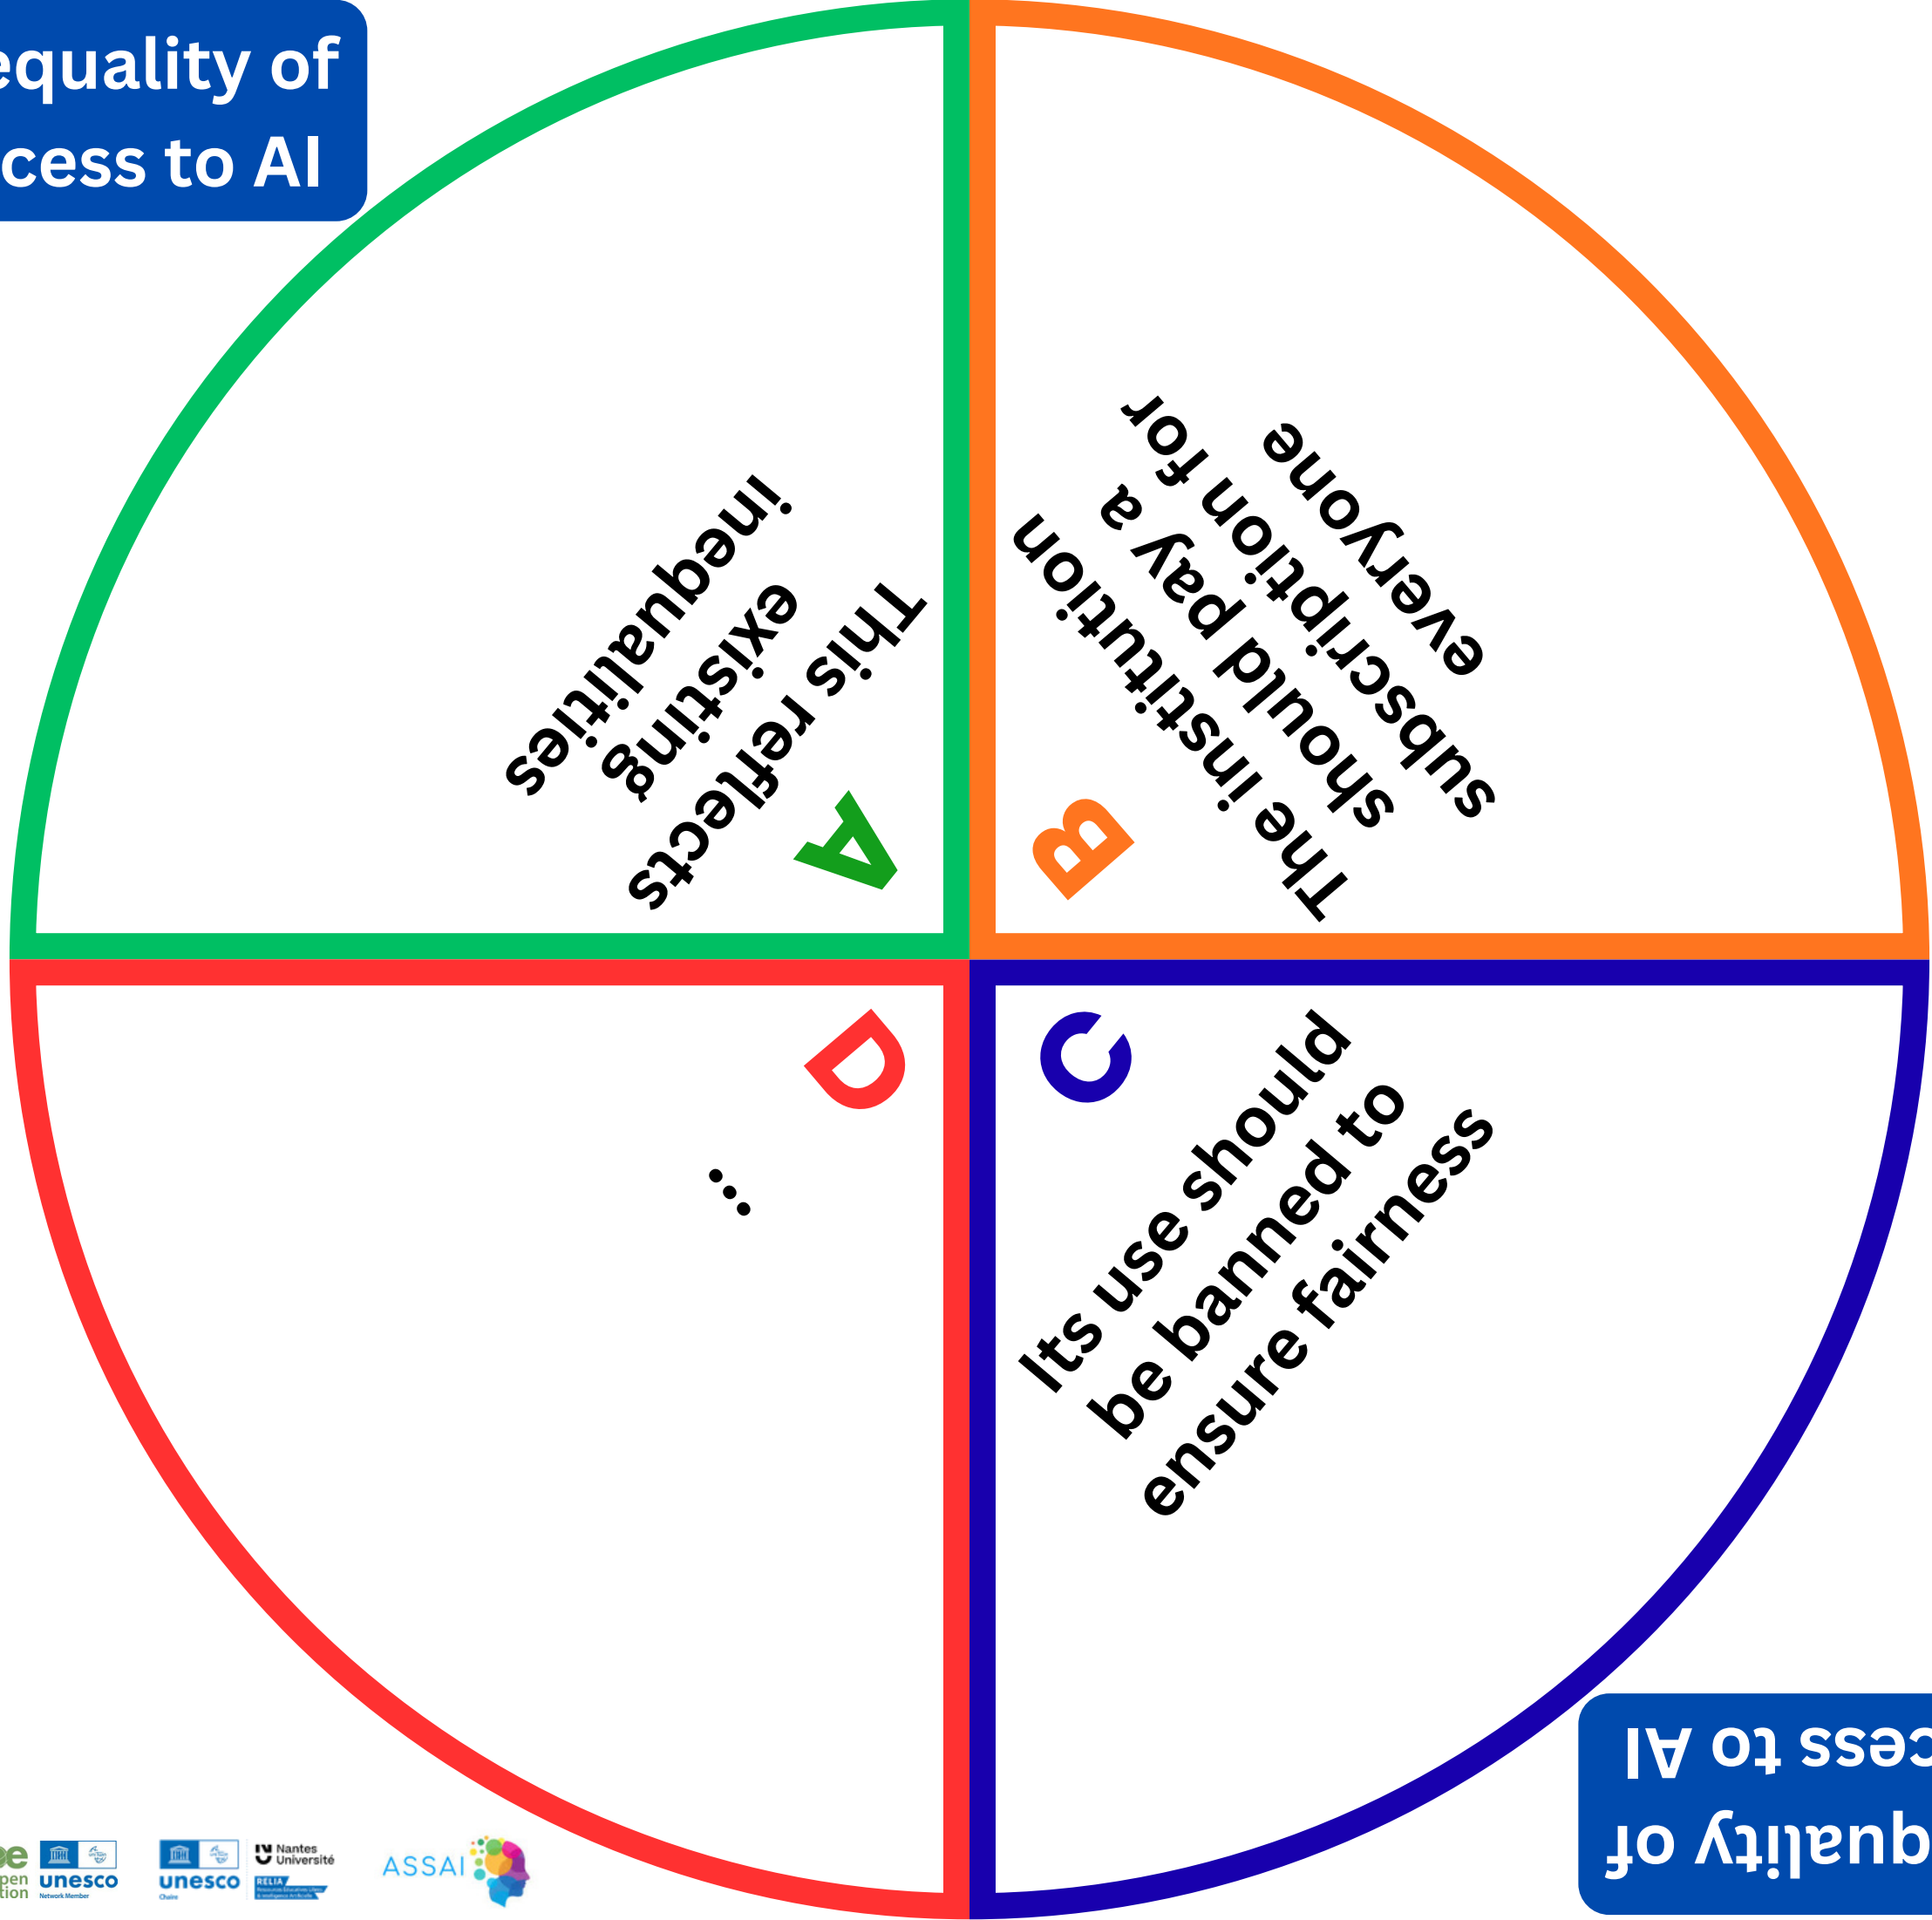

...

Suspicious of AI use without evidence

A student, who attended few classes and previously got poor results, hands in an excellent assignment. The teacher is convinced the student used AI, but has no proof.

Some students have paid subscriptions to more powerful Generative AI tools, but others have to use more limited free versions.

Inequality of access to AI

Inequality of access to AI

Some students have paid subscriptions to more powerful Generative AI tools, but others have to use more limited free versions.

A university is proposing to close the foreign languages department to cut costs.

AI and language learning

A
AI makes language learning unnecessary

B
Learning languages develops important skills that AI cannot replace

C
Instead of closing it, teach how to use AI to communicate in foreign languages

...

D

AI and language learning

A university is proposing to close the foreign languages department to cut costs.
